

PC-5ESFTPPVC-BK5

Patchcord securityNET cat.5e SF/UTP PVC black
5m

securityNET Category 5e screened (SF/UTP) patch cords are reliable solutions for data transmission in computer networks. They offer a data transmission speed of 2.5 Gbps, ensuring stability and protection against electromagnetic interference. These durable patch cords are compatible with various network devices and are ideal for demanding environments where transmission reliability and data security are crucial.

Execution core	CCA
Category/Class	5e
Shielding type	SF/UTP
Outer diameter	5,7 mm
Cable construction	4x2
AWG	26/7
Minimum bend radius (installation)	25mm
Transmission	2,5 Gbit
Bandwidth	100 MHz

Operating temperature	-20°C to 60°C
-----------------------	---------------

Length	5m
Colour	black
Jacket material	PVC
