

Data Sheet

Surface-mount deep 65mm 2-module enclosure for 45x45 fixtures, code: OBUK-2-65

Description and Technical Characteristics of the Product:

Surface-mount enclosures are designed for mounting electrical and ICT equipment in 45x45 standard. The sockets in 60mm standard can only be mounted in a 2-module enclosure (OBUK-2/M), after replacing the screws with flat head screws, but please ensure that the frame is adjusted in relation to the fixture and the enclosure.

The components included: surface-mount enclosure (OBU) for two 22.5x45 modules or one 45x45 module, mounting bracket (SUP), masking frame (RAM).

The surface-mount deep enclosure has more space for cables and allows for smaller bending radius. Recommended especially for Cat. 6A and Cat. 6 structured cabling, where cables with larger diameters are used.

The enclosure can be put together multiple times, the side walls have knockouts to facilitate the preparation of holes for cable routing.

NOTE: OBUK-2-65 enclosure should not be combined with other OBUK-type enclosures (they have a different angle of inclination of the walls).

Installation method:

Cut a hole at the desired location, in the side wall of the enclosure using the guides. If necessary, install a connector (E K/PU) connecting the enclosure to the duct. Then screw on the mounting bracket (SUP), snap in the network or computer socket and snap in the RAM masking frame.

Markings:

Surface-mount 65mm deep 2-module enclosure for 45x45 fixtures (includes metal SUP bracket and RAM frame), Code: OBUK-2-65

Technical parameters:

Mechanical:

colours: white

dimensions (W x H x D): 80x80x73mm; weight: 125g

material: ABS (enclosure and masking frame), metal brackets
